PRODUKTION

Actyx OS

IPFS

What works, what doesn't

- Distributed content addressed storage 😊
- Pubsub 😐
- Private swarms 😐
- Android support 😐
- IPNS 😞 (we are using dnslink now!)
- Perf and resource usage 😐

Wish list

- Basic abstractions have **got to work**
- Basic abstractions have **got to have high perf**
- Officially supported rust ipfs
- KISS
